

HANGING EGG CHAIR INSTALLATION

The Nanna Ditzel Egg Chair is rated to hold 400 pounds. Professional installation is required for hanging any Sika Design hanging/swing chair. The below are recommendations and must be reviewed and approved by a licensed professional in order to ensure they comply with local requirements and building codes.

FOR CONCRETE

Use heavy-duty pad eye secured to the concrete.

FOR JOIST OR BEAM

An appropriately rated joist or beam is required to support the maximum load (chair, equipment, and person) in both a static and dynamic load environment.

HARDWARE

Review all hardware choices with your general contractor.

- [Heavy Duty Square Pad Eye](#)
- [Heavy Duty Diamond Pad Eye](#)
- Spring Clip: 400-pound static weight rating
- Jaw & Jaw Swivel: 600-pound static weight rating
- Chain: 1,200-pound static weight rating
